

VETERINARY CHIROPRACTIC PET HEALTH UPDATE

Animal Family Veterinary Care Center

is pleased to announce a new service to our spectrum of care. **Meredith Grady, DVM** is now certified to provide Veterinary Chiropractic care.

What is Veterinary Chiropractic?

Veterinary Chiropractic involves manipulation of the spine and joints with the hope of relieving pain and improving function of the nervous system. An underlying belief in chiropractic medicine is that if a joint is not moving properly, the body cannot maintain normal health.

What Animals would benefit from Veterinary Chiropractic Care?

Both dogs and cats can benefit from chiropractic care. Some of the most common treatments include:

- **Lameness or stiffness**
- **Difficulty getting up or down**
- **Decreased range of motion**
- **Decreased athletic performance**
- **Chronic musculoskeletal problems**

All patients can benefit from chiropractic care because there may be early spinal or neurological dysfunction before any symptoms are even noticed by an owner.
