All the professionals at Animal Emergency Clinic must meet extensive educational training and screening requirements to qualify to care for your pets.

Our Compassionate Staff Really Cares

The Animal Emergency Clinic is a caring extension of your family veterinarian. We exist to meet the needs of your pet and family veterinarian by offering emergency and critical care services. Working in conjunction with your family veterinarian we provide evening, weekend, and holiday services designed to assist in the treatment of injured or ill animals. Our veterinarians with a special interest in emergency medicine ensure your pet receives the highest quality of appropriate and necessary medical treatment. Our entire staff is devoted to providing a caring environment treating both people and pets with dignity, kindness, and respect.

Specialized Compassionate Pet Care

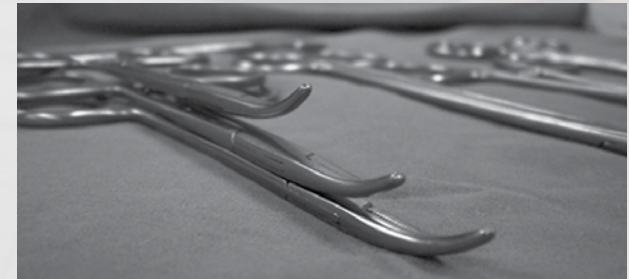

Emergency Care

Animal Emergency Clinic is a specialized animal critical care facility. Our state-of-the-art veterinary care facility and highly trained veterinarians and technicians can handle any pet emergency, from a small laceration to major trauma. Your pet will receive all required treatments, monitoring and pain management.

We utilize the most advanced technology and expertise currently available. We can tailor treatment protocols to fit your resources and special needs, providing the optimum course of therapy to fit your situation. We will work with you and your regular veterinarian as a team to give you the peace of mind that your pet will receive the medical care he or she requires at any hour, in any emergency.

Patient Transfer

All patients requiring ongoing care following emergency services must be transferred to their family veterinarian between 6:30am - 7:30 am the next business day. All follow-up care, such as suture and drain removals, must be performed by your family veterinarian. If you do not have a regular veterinarian, we will be happy to recommend one to you.

Fees and What to Expect

Upon arrival to the Animal Emergency clinic, a receptionist will assist you by checking your pet in and placing you into an exam room as soon as possible.

Emergency care can be very costly, reflecting the state-of-the-art facilities and professional staff needed to provide emergency and critical care. Each admission involves an emergency office call which includes the emergency fee and examination. Following the examination, treatment options will be discussed and a Healthcare Plan will be provided for the cost of any additional veterinary services.

You are encouraged to discuss any fees and treatment options with our professional staff. A deposit based on the cost of the Healthcare Plan will be required for any animal being admitted to the hospital. Payment in full is required at the time of discharge. For your convenience, we accept Visa, MasterCard, Discover, CareCredit®, and cash. Personal checks will be accepted only with check approval and proper identification must be provided
